

Nurse Checklist - Maricopa County Sealant Program

- _____ The consent forms will be distributed to 2nd AND 6th grade students as soon as possible. The forms should be returned to you by the teachers 1-2 weeks after distribution.

- _____ Ask principal/staff to make daily announcement about returning the signed Sealant Consent forms to their teachers.

- _____ If consent return is low, try to reach parents by phone, especially if you are aware of or suspect dental problems.

- _____ We have an Outreach Specialist that is available to give grade specific classroom presentations about good oral health and sealants which has helped increase consent return significantly. Call (602)506-6946 to schedule.

**More sealants = less tooth decay.
Sealants are a proven prevention for cavities.**

- _____ We are accommodating requested scheduling of services as best we can. We will contact you a few weeks after you receive your forms to determine if you have the minimum number of consents returned (25) to schedule a date for services.
Participation status will then be reported to the Arizona Department of Health Services (ADHS).
- _____ Collect consent forms from teachers. Organize forms by class with a class roster on top.
- _____ When your school has been scheduled, you will receive an email with detailed instructions/information about screening and sealant day(s).

Please help us reach our goal to ensure ALL parents are aware of this NO-COST preventive program and to prevent tooth decay in as many kids as possible!

THANK YOU!!
